# At Mazik Global, we're responding innovation-first to the impacts of COVID-19 on healthcare organizations, individual health, and communities.

Healthcare organizations are facing challenges they must respond to quickly. We're working with our partners at Microsoft to help prepare and respond with **innovations that reduce the burden on the health system and give communities peace of mind**.

Our new apps and solutions take on today's key healthcare concerns, including *accurate and swift reporting* of COVID-19 patients to public health agencies, *triaging patients* to identify the right candidates for testing, and *tracking virus's spread* faster.
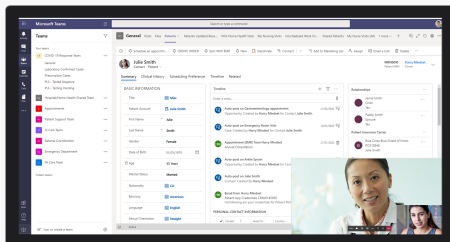

Solution for Healthcare Teams & Agencies: COVID-19 Screening PowerApp

The MazikCare COVID-19 Screening App converts the *CDC's in-person paper diagnostic form* into an easy-to-use Microsoft PowerApp to *reduce paperwork & data entry and speed up & centralize data collection*. It also integrates with EMRs like Epic & Cerner. Available to any healthcare organization that needs it.

Solution for Telehealth & Conferencing, HLS & Beyond

Telehealth and video conferencing are increasingly key to minimizing population exposure and reducing burdens on the system. *Along with promoting the Teams free trial, we're busy deploying Microsoft Teams with easy patient record unification* by including our proprietary EMR connector.

Two Solutions for Consumers and Healthcare Orgs: COVID-19 Screening Chatbot and Patient App

Like the Screening PowerApp, our Symptom Checker Chatbot and Patient App (right) mirror the CDC's own COVID-19 assessment. They let users screen anonymously or with an account that *collects their diagnostic data to help track symptoms as they progress.* User accounts can be linked between the two platforms and the data can be shared with a provider, hospital, or shared with public health agencies. These solutions are meant to give users peace of mind on their symptoms *and reduce unnecessary hospital visits to flatten the curve.*

OUR TEAM

For almost two decades, Mazik Global has dedicated its teams to creating and implementing IT and data solutions in the best interest of healthcare businesses to ensure they and their patients thrive. Our leadership team includes longtime CIOs and health informatics leaders, including:

- **Pat Becker, CSO**
- **Suresh Krishnan, CTO**

Each has made their mark transforming healthcare operations at institutions such as *University of Chicago Medicine* and *AMITA Health* in the last 30 years.

IMPLEMENTATION

Mazik Global is following rapid implementation and agile methodology to deploy these solutions to our customers and to help them prepare an effective COVID-19 response.

Deployment Estimates

SCREENING POWERAPP	1-5 DAYS
TEAMS TELEHEALTH	2 WEEKS
PATIENT APP *	IMMEDIATE
SCREENING CHATBOT	2 DAYS

* Subject to availability in app stores
