

## MazikCare COVID-19 Symptom Checker Chatbot

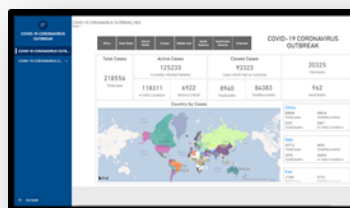

A simple, secure screening tool for healthcare websites that quickly connects users to the right level of care – and peace of mind

- Centralized, **real-time public health tracking** on virus's spread
- **Pinpoints growing virus hotspots** by tracking symptoms, not just cases
- Users quickly know if their next step is **treatment or isolation**
- **Integrates with existing electronic medical records (EMRs)**
- Users participate anonymously or **track symptoms progressively**

 **Try It Now**

### Accurate, swift data for providers & public health reporting

- Users can anonymously submit their symptoms, encouraging more community self-reporting
- Symptom-collection data helps track virus hotspots, helping providers prepare resources
- Integrates with EMRs and other MazikCare apps for a more end-to-end COVID-19 solution

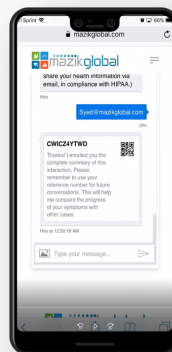

### Peace-of-mind self assessments for the community

- Users who connect an email address to their screening receive an email summary and a unique QR code, giving them the option to continue logging their symptoms over time
- Users know quickly whether it's better to self-isolate or if their symptoms require medical attention
- Easy to share results with a provider

### Improves triage speeds, reduces burdens on healthcare system

- Reduces unnecessary visits to clinics and ERs, minimizing transmission risk and helping flatten the curve
- Quickly ID's the right candidates for testing, helping ensure tests are available for those who really need it
